

Leave the Details to Us...

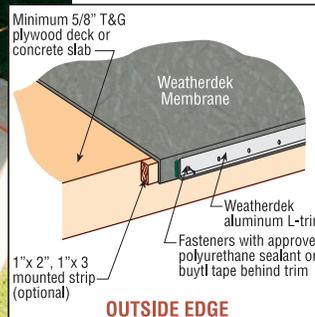

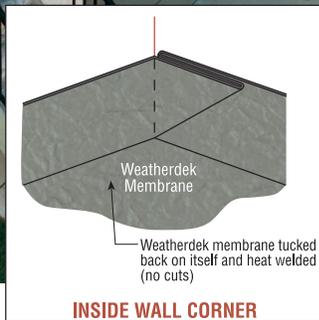

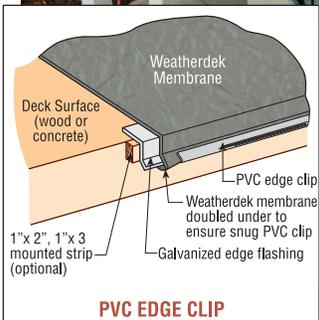

Weatherdek Membranes have been professionally engineered, and field proven to combine guaranteed waterproofing and rugged durability into a fully adhered single application of impenetrable protection. Available in a variety of thickness, patterns, colours, textures and widths in order to create an effective solution for any application.

Weatherdek membranes are professionally installed by skilled installers to create neat, clean details designed to protect your deck from damaging water penetration and ensure a lasting, durable finish to your outdoor living space.

Laid out and fully adhered to most smooth substrates, Weatherdek membranes are heat welded at all joints creating a continuous layer of waterproofing protection.

Weatherdek membranes are designed with detail in mind, the sheer versatility and design options make Weatherdek the right solution for any type or style of waterproofing situation.

Note: The details shown here are used as examples and may not be the correct detail for all applications, consult your local Weatherdek Dealer for the correct details specifically for your application.
